

## Artificial Intelligence / Machine Learning papers using Alyawarra Kinship Term Applications data: a partial bibliography

Kemp, Charles, Thomas Griffiths and Joshua Tenenbaum

2004 Discovering latent classes in relational data. MIT Computer Science and Artificial Intelligence Laboratory Technical Reports MIT-CSAIL-TR-2004-050. <http://hdl.handle.net/1721.1/30489> (view .pdf version); Alyawarra kinship data in Matlab format: <http://charleskemp.com/code/irm.html>

Kemp, Charles, Joshua Tenenbaum, Thomas Griffiths, Takeshi Yamada and Naonori Ueda.

2006 Learning systems of concepts with an infinite relational model. *AAAI Proceedings: 21st National Conference on Artificial Intelligence*. 2006: 381-388 <http://cocosci.dreamhosters.com/tom/papers/irm.pdf>

Kok, Stanley and Pedro Domingos.

2005 Learning the structure of Markov logic networks. *Proceedings of 22nd International Conference on Machine Learning: ICML 2005*:441 – 448 <http://dl.acm.org/citation.cfm?id=1102407>

2007 Statistical predicate invention. *Proceedings of the 24th International Conference on Machine Learning: ICML 2007*:433-440 <http://dl.acm.org/citation.cfm?id=1273551>

Roy, Daniel M., Charles Kemp, Vikash K. Mansinghka, and Joshua Tenenbaum.

2007 Learning annotated hierarchies from relational data. *Advances in Neural Information Processing Systems 19: NIPS 2007*:1-8 <http://danroy.org/papers/RoyKemManTen-NIPS-2007.pdf>

Miller, Kurt T., Thomas Griffiths and Michael Jordan.

2009 Nonparametric latent feature models for link prediction. *Advances in Neural Information Processing Systems 22 (NIPS 2009)*:1-9. <http://papers.nips.cc/paper/3846-nonparametric-latent-feature-models-for-link-prediction>

Sutskever, I., Salakhutdinov, R., Tenenbaum, J.B.

2009 Modelling relational data using Bayesian clustered tensor factorization. *Advances in Neural Information Processing Systems 22 (NIPS 2009)*:1821-1828. <http://papers.nips.cc/paper/3863-modelling-relational-data-using-bayesian-clustered-tensor-factorization.pdf>

Menon, A.K and C. Elkan

2010 Dyadic prediction using a latent feature log-linear model. *arXiv:1006.2156v1 [cs.LG]* 10 Jun 2010. <http://arxiv.org/pdf/1006.2156.pdf>

Jenatton, Rodolphe; Le Roux, Nicolas; Bordes, Antoine; Obozinski, Guillaume

2012 A latent factor model for highly multi-relational data. *Advances in Neural Information Processing Systems 22 (NIPS 2012)*: <http://papers.nips.cc/paper/4744-a-latent-factor-model-for-highly-multi-relational-data>

Galbrun, Esther and Kimmig, Angelika

2012 Towards finding relational redescrptions.

*Discovery Science Lecture Notes in Computer Science*, Volume 7569, 2012, pp. 52-66.

[https://lirias.kuleuven.be/bitstream/123456789/352331/1/galbrun\\_kimmig\\_DS12.pdf](https://lirias.kuleuven.be/bitstream/123456789/352331/1/galbrun_kimmig_DS12.pdf)

*Proceedings, 15th International Conference on Discovery Science (DS 2012)*, Lyon, France.

<http://eric.univ-lyon2.fr/ds-2012/>

2014 Finding relational redescrptions. *Machine Learning*, September 2014, Volume 96, Issue 3, pp. 225-248.

<https://lirias.kuleuven.be/bitstream/123456789/411325/1/galbrun-mlj13.pdf>

Bordes, Antoine; Glorot, Xavier; Weston, Jason; Bengio, Yoshua

2014 A semantic matching energy function for learning with multi-relational data. *Machine Learning*, February 2014, 94(2):233-259. [http://www.thespermwhale.com/jaseweston/papers/ebrm\\_mlj.pdf](http://www.thespermwhale.com/jaseweston/papers/ebrm_mlj.pdf)
