Basis of genealogical diagrams: All people who resided in any of the six camps on any of the nine census days appear in the single genealogical diagram in this data set. See this item in Iglulik 1961 data file for further information concerning differences between this version of Damas' Iglulik data and his 1963 version; again, the newer version supercedes the older. Note that squares (□) in the genealogical diagrams denote people (almost always small children) of unknown sex, while a dark symbol without an "X" denotes a living person who resides outside these villages but serves as a genealogical link between villages.

Number of living people: 85 (a small portion of the total population of 514) Number of data records: 104 (including deceased links and living links who resided outside the villages)
